UiPath Solution Components and Licensing Model

UiPath Studio and Robots

Studio is used to develop the workflows for the processes that will be automated.

Studio

UiPath Studio can be licensed both Node Locked or Authorized User.

UiPath

Attended Robot

The two robots run the processes created on UiPath Studio. The main difference between them is that for the Authorized User you will need human input and for the Unattended Robot you don't.

Unattended Robot

UiPath Attended Robot can be licensed both Node Locked or Authorized User.

UiPath Unattended Robot can be licensed   Only   as Node Locked.

Also the Unattended robot can run behind locked screen.

UiPath Orchestrator

UiPath Orchestrator is a game - changer and an industry standard. A highly scalable server platform, enabling fast deployment, from one robot to dozens, or even hundreds.

Orchestrator

You can audit and monitor the robot activities, schedule all types of processes, and manage work queues. Create world - class reporting from Elasticsearch and Kibana tools.
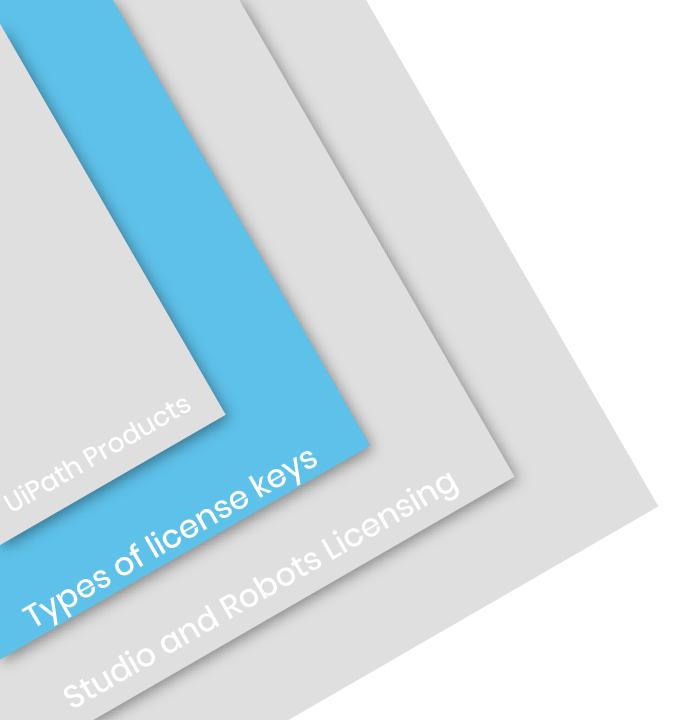

Built with a modern and modular architecture, Orchestrator can be deployed in the cloud or on - premises. Physical or virtual machines, it is easy and practical to start small and grow quickly.

UiPath

Orchestrator can only be Centralized Licensed.

Types of license keys

Studio and Robots Licensing

Types of
License Keys

Ui Path
Robotic Process Automation

Node Locked

___

The Node Locked license is linked to the Device ID of the machine and can be used by multiple users but only one at a time.
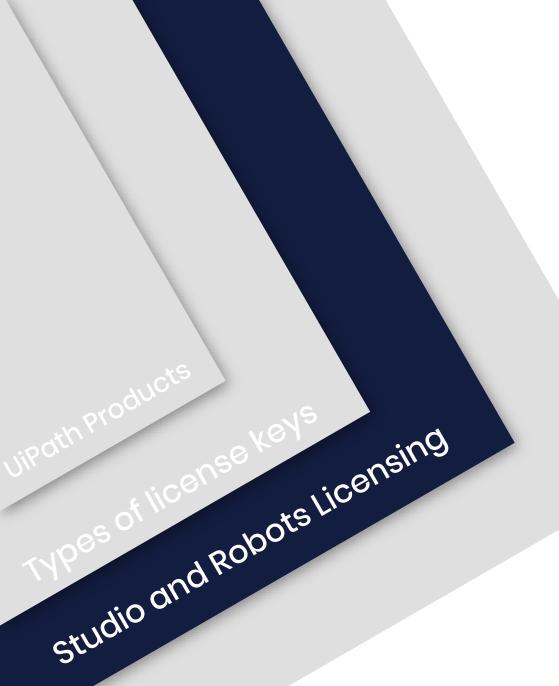

Authorized User

___

The Authorized User license is linked to the email address of the person using the license. It can be installed on maximum two devise. (work and home)

Centralized

___

The Centralized license is a license key provided for both the UiPath Orchestrator and Robots. The customer can move the robots whenever they want without asking us to do it.

Studio & Robots Licensing

UiPath Products

Types of license keys

Studio and Robots Licensing

UiPath Studio

Node Locked

- For Studio Node-Locked type, the number of activations allowed is equal with the number of Studio which have been purchased included on a single license key.

Authorized User

- For each Studio license key Authorized User type, we provide customers with a license key with Studio profile with 2 activations allowed.

UiPath Attended Robot

UiPath
Robotic Process Automation

Node Locked

For Attended license key Node-Locked type, the number of activations allowed is equal with the number of Attended Robots which have purchased included on a single license key.

Authorized User

For each Attended Robot license key Authorized User type, we provide customers with a license key with the Attended profile with 2 activations allowed.

UiPath – Hardware and Software Requirements

Studio

Type of Hardware	Minimum	Recommended
CPU	1 GHz 32-bit (x86)	Dual Core 64-bit (x64)
RAM	1GB	4GB

UiPath Studio	Minimum	Recommended
Operating System	Windows 7	Windows 7+
.NET Framework	4.5	4.6

Setup Size on Disk*	Archived	Installed
	70MB	180MB

UiPath Robot	Minimum	Recommended
Operating System	Windows 7	Windows 7+
.NET Framework	4.5	4.6

* For both **UiPath Studio** and **UiPath Robot** (one single installer).
